
Graduate Research Assistant (GRA) position: The GRA will be responsible for providing research support for various Scientific, Engineering and Information/Data Visualization software tools that our group supports. Research Support includes:

- Installation and configuration
- Documentation
- Exploring projects and use cases
- Training sessions
- Office hours

Demonstrable experience with Windows and Linux OS admin is essential. The GRA will also be working with the Palmetto Cluster GPUs. Familiarity with one or more of the following is a plus: scientific/engineering software (e.g. Paraview, VMD, VisIt, CUDA, VTK), InfoVis tools (e.g. Gephi, Graphviz, Tableau, D3.js) and cluster tools (e.g. Python, MPI). If you are interested in this position, please send your **resume** to cuviz@clemson.edu with subject heading "Graduate Research Assistant", plus a **paragraph** indicating your level of experience/expertise with the software tools. The position is a full-year assistantship (Summer 2017, Fall 2017 and Spring 2018) paying \$18,000 plus GAD, starting May 2017 and working 20 hours per week.
